

Imran Choudhary

Full Stack Web Developer

+91-79775 92554 - cimran1307@gmail.com - linkedin.com/in/imran-choudhary-a73398250 - Mumbai

Skills

- Frontend — HTML5, CSS3, JavaScript (ES6+), React.js, Next.js (App Router), Tailwind CSS, ShadCN UI, TypeScript
- Backend — Node.js, Express.js; REST API design and implementation
- Databases — MongoDB, MySQL; schema design, querying, dynamic data storage
- Performance & SEO — ISR, CDN, lazy loading, image compression, Core Web Vitals, structured metadata
- Tools & Platforms — Git, GitHub, Vercel, VS Code, npm, RESTful APIs, OneSignal, Umami Analytics
- Development Practices — Agile, version control, responsive design, mobile-first UI, collaborative development

Overview

Full Stack Web Developer skilled in React.js, Next.js, Tailwind CSS, Node.js, Express, and databases (MongoDB, MySQL). Built and deployed animexcite.com — a production-grade anime and football content platform (Next.js + MongoDB on Vercel) with live traffic, AdSense monetization, push notifications, and ISR-powered performance. Qualified for the Meta x Hugging Face Hackathon (selected from 70,000+ applicants). Currently in final year of B.Sc. Computer Science at Shankar Narayan College, Mumbai.

Work Experience

Full Stack Web Developer Intern

Feb 2025 – Present

XciteMedia — Mumbai

- **Platform Build:** Independently designed and developed AnimeXcite.com, a production-ready full-stack blog platform for anime and manga — frontend in Next.js (App Router), Tailwind CSS, and ShadCN UI; backend REST APIs in Node.js & Express; dynamic data stored in MongoDB.
- **Performance & SEO:** Implemented ISR (Incremental Static Regeneration), CDN caching, lazy loading, and image compression; added structured SEO metadata and Core Web Vitals optimisations — deployed on Vercel with a custom domain.
- **Monetisation & Integrations:** Integrated Google AdSense; set up Easebuzz payment gateway for premium features; added OneSignal push notifications for comment-reply alerts and Umami Analytics for privacy-first traffic tracking.
- **Football Dashboard:** Built a live football data feature using the Sportmonks API — live scores, fixtures, lineups, and standings displayed via custom React components with real-time updates.
- **Features:** Category-based filtering, advanced search, mobile-first responsive layouts, and structured SEO data — drove organic traffic growth with a viral One Piece article achieving significant page views.

Projects

AnimeXcite — Anime, Manga & Football Content Platform

animexcite.com

- Full-stack platform built with Next.js (App Router), Tailwind CSS, ShadCN UI on the frontend; Node.js, Express REST APIs, and MongoDB on the backend — deployed live on Vercel with a custom domain.
- Integrated Google AdSense, Easebuzz payment gateway, OneSignal push notifications, and Umami Analytics.
- Live football dashboard powered by Sportmonks API — real-time scores, fixtures, lineups, and standings.
- Optimised via ISR, CDN, lazy loading, image compression, and structured SEO metadata for Core Web Vitals.

Medical Triage — Hackathon Project

Hugging Face Spaces

- Developed a Medical Triage system using Reinforcement Learning (RL), where we designed and trained a custom environment for healthcare-related decision making.
- Worked with GRPO, OpenEnv, and Unsloth to train and fine-tune the model for task-specific performance optimization.
- Gained hands-on experience in RL workflows, environment creation, model training, and fine-tuning techniques.
- Built at the Meta x Hugging Face Hackathon (Bangalore); selected from 70,000+ nationwide applicants.

Education / Achievements

Bachelor of Computer Science

Completed April 2026

Shankar Narayan College, Mumbai University

Web Designing Competition — 1st Place

Shankar Narayan College

- Secured 1st place by developing a fully responsive and functional website using HTML, CSS, and JavaScript.

Meta x Hugging Face Hackathon — Qualified

Bangalore

- Selected among 800 participants out of 70,000+ registrations nationwide.
